

Registrar-In-A-Box – RIB™

Highlights

Fastest move-to-market registrar solution available

Comes fully equipped to handle domain registrations in multiple TLDs and multiple languages.

Powerful plug-and-play structure that is customizable to business and volume needs

Supports all protocols requisite for core and value-added functions (i.e. payment gateways)

Reruns on any flavor of UNIX and popular platforms like Windows NT/2000

ASP model that provides a centrally controlled platform for cost effective operations

Built-in functionalities for registrants to manage their own domain and account information

Dedicated technical support to facilitate adoption and migration processes

The Easiest and Most Complete Solution to Start Your Registrar Business

Registrar-In-A-Box (RIB) is designed as a generic registration platform of objects. Currently, the supported objects include domain names. Value-added features are also included to assist and help clients in the construction and management of their business.

ASP Model Lowers Entry Barrier for Your Business

i-DNS.net adopts an Application Service Provider (ASP) model that provides all the necessary infrastructure and “know how” to design, build and administer your operations. This facilitates a rapid move-to-market strategy, thereby lowering the entry barrier for new Registrar / Reseller partners.

Consultative Approach To Meet Your Business Needs

RIB provides clients with the option of customizing their products with their own look and feel. This makes the system relevant to each registrar’s brand equity in accordance to the diverse requirements they may have.

Value-added Solutions

- Consulting services on policy and technology issues
- User-friendly administration modules or client-side programs
- Multiple payment gateway support that includes:
 1. Cybersource
 2. Netgiro
 3. Worldpay
 4. VeriSign

RIB™ Developments

- Built-in Bi-Directional Multilingual Thesaurus Engine that suggests native variants of a requested domain name to aid registrants in their registration
- Incorporated module allows registrants of multilingual domain names to receive add-on multilingual e-mail functionality

Core functionalities of Registrar-In-A-Box RIB™

About i-DNS.net

Headquartered in Palo Alto, CA with offices in China, Japan, Korea, and Singapore, i-DNS.net International is the leading provider of multilingual Internet technologies and solutions.

The Company's core multilingual domain name technology allows people to use the language of their choice to navigate the Internet.

By pioneering the global deployment of multilingual Internet technology and championing the use of internationalized domain names, i-DNS.net seeks to bridge the gap that has hindered Internet access for non-native English users of the world.

RIB™ is an all-in-one registrar setup solution developed by i-DNS.net that allows for flexibility and scalability.

Registrars can now perform the following functions with 'near real-time' resolution:

Name Holder Administration

- Our Name Holder Administration System includes Domain/TLD check, registration, modification, update, renewal, transfer and deletion
- It also allows for contact detail administration such as update, modification, registration and deletion

Registrar Administration

- Our Registrar Administration system includes enhanced domain administration (suspension, re-activation, association, etc), listing of domains via various entity fields, nameserver updates, detailed domain activity reports and more.

Financial Administration For Registrars

- Our Financial Administration System includes the querying of summary monthly charges, management of pre-paid accounts, tracking of domain to-date information, pre-paying charges for registrations/renewals, invoice raising and more

Service Offerings

- All RIB clients' solutions are implemented on Sun Solaris servers in a carrier grade co-location facility.
- For critical support issues, clients are provided with a 24 X 7 help number (availability is subject to SLA committed to in agreements)
- For non-critical support issues, clients are allocated two official support contacts from their organization through which they can access RIB's support engineers for assistance.

Other value-added functions include:

- Facilitating Account managers to wholly "Manage" their account
- Manage invoice and payment processing to Resellers
- Provide statistics and database reporting
